

# MATHESHWAR S R

+91 7338933841 | matheshwar.srinivasan@gmail.com  
in <https://www.linkedin.com/in/matheshwar-s-r-95796a1b0/>

## SKILLS

---

- **Containers & Orchestration:** Kubernetes, Docker
- **Infrastructure as Code(IaC):** Terraform
- **CI/CD Tools:** Jenkins, GitHub Actions
- **Monitoring & Metrics:** Prometheus
- **Cloud Platform:** AWS (Amazon Web Services)
- **Programming & Scripting:** Python, Shell Scripting
- **Version Control:** Git, GitHub
- **Configuration as Management:** Ansible

## CERTIFICATIONS

---

- **CERTIFIED KUBERNETES ADMINISTRATOR (CKA)**  
<https://www.credly.com/badges/2b4ae827-dff3-4149-95eb-c50013a81a09>
- **CERTIFIED KUBERNETES APPLICATION DEVELOPER (CKAD)**  
<https://www.credly.com/badges/3e57492a-8ddf-46d9-94de-ffe7f1de69b3>
- **AWS CERTIFIED SOLUTIONS ARCHITECT – ASSOCIATE (SAA-C03)**  
<https://www.credly.com/go/P4CbHqGvSt4lt815A5wOYQ>

## EXPERIENCE

---

- **Revolite Infotech Pvt Ltd** December 2025 - Present  
Role: Junior DevOps Engineer
  - Migrated legacy PM2/nohup deployments to Docker containers and orchestrated them on Kubernetes, managing deployments, services, and config maps while implementing Blue-Green strategies for zero-downtime releases
  - Built end-to-end CI/CD pipelines using Jenkins and GitHub Actions, automating application delivery across dev, staging, and production environments
  - Deployed full observability stack using Prometheus, Grafana, Loki, Promtail, and Tempo for real-time metrics, centralized logging, and distributed tracing
  - Managed cloud infrastructure on AWS and provisioned environments using Terraform for scalable, reliable, and repeatable infrastructure setup
  - Deployed and configured applications on Internet Information Services (IIS) server for Windows-based hosting environments.
- **CandorBees Technologies Private Limited** February 2025 - November 2025  
Role: DevOps Engineer Intern
  - Containerized both frontend and backend applications using Docker Compose and deployed them on an AWS EC2 instance, enabling seamless multi-container orchestration and service management.
  - Configured a custom domain with AWS Route 53, and set up an Nginx reverse proxy with Let's Encrypt SSL to provide secure HTTPS access with automatic certificate renewal.
  - Implemented a CI/CD pipeline using GitHub Actions to automate the entire deployment process, including Docker image build, push to Amazon ECR, and deployment to the EC2 instance.
  - Used GitHub Secrets and SSH automation to securely transfer the Docker Compose configuration to EC2 and execute deployment commands, ensuring zero manual intervention in production releases.

## EDUCATION

---

- **R.M.K College Of Engineering and Technology** 2020-2024  
Bachelor of Engineering in Computer Science

## PROJECTS

---

- **End-to-End DevOps for a Go Web Application**
  - Containerized a Go web application using Docker multi-stage builds, reducing image size by ~50%.
  - Automated CI/CD pipelines using GitHub Actions & ArgoCD, cutting deployment time by ~60%.
  - Orchestrated Kubernetes clusters with ArgoCD & Helm, improving scalability and high availability by ~70%.
